PROFILE

Final-year Computer Science undergraduate with experience building full-stack, real-time, and AI-powered applications. Proficient in Java, Spring Boot, Flutter, React, MongoDB, REST APIs, WebSockets, and AWS fundamentals. Strong background in backend development, software engineering, and data structures, with hands-on experience delivering scalable applications from design to deployment.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science
Cambridge Institute of Technology, Tatisilwai Ranchi
CGPA: 7.9/10

Ranchi, Jharkhand
Expected Graduation: July 2026

EXPERIENCE

Data Science Intern — Unified Mentor — Gurgaon, Haryana
Project Links: [GitHub-Link1](#) | [GitHub-Link2](#)

May 2024 – June 2024

- Analyzed Amazon sales data to identify seasonal patterns and high-performing products using Pandas and NumPy.
- Entertainment Analysis – Explored audience behavior and genre preferences.
- Performed data analysis & visualization using Python, Pandas, NumPy, Matplotlib, Seaborn.

Java Development Intern — Cognifyz Technologies — Nagpur, Maharashtra
Project Link: [GitHub](#)

May 2025 – June 2025

- Built Java applications – Developed multiple Java mini-projects (Converter, Checker, Calculator, Generator).
- Developed advanced projects – Tic-Tac-Toe Game, Password Strength Checker, File Encryption/Decryption.

PROJECTS

SyncForge — Real-Time Collaborative Project Management Platform **Tech Stack:** Flutter, Java, Spring Boot, Spring Security, WebSocket (STOMP), MongoDB, JWT, Gemini AI **GitHub:** [GitHub](#)

- Developed a full-stack project management platform featuring task tracking, file sharing, comments, and collaboration.
- Implemented JWT-based authentication, role-based access control, and secure REST APIs using Spring Security.
- Built a real-time Kanban board and notification system using WebSocket (STOMP) for instant task updates.
- Integrated MongoDB for scalable data storage and Gemini AI for intelligent task description generation and productivity enhancement.

MindCore-LLM — Mini Transformer Language Model (Personal Project)
GitHub: [GitHub](#)

- Implemented a custom Encoder-Decoder Transformer based on “Attention Is All You Need” (2017).
- Implemented end-to-end NLP pipeline with tokenization, data processing, model training, and generation.
- Trained the model on custom corpus using PyTorch, achieving stable loss and usable text generation.
- Designed inference module with top-k, top-p sampling, and checkpoint loading.

Real-Time Chat App — React, Spring Boot, WebSocket (STOMP), JWT, MongoDB
GitHub: [GitHub](#)

- Built a real-time chat system with JWT authentication and WebSocket (STOMP) messaging.
- Implemented room-based chat, permission checks, and persistent storage using MongoDB.
- Designed a responsive UI with React + Tailwind CSS, supporting instant message updates.
- Added scalable backend architecture with WebSocket interceptors, message broadcasting, and error handling.

SKILLS

Programming Languages & Tools: Java, Python, JavaScript, SQL, C, IntelliJ IDEA, VS Code, Postman

Backend Technologies: Spring Boot, Spring security, REST APIs, WebSocket (STOMP), JWT, OAuth2, MongoDB, JPA, Hibernate, Microservices Architecture

Frontend Technologies: Flutter, Dart, React.js, Android Studio, Tailwind CSS, HTML

Messaging & Streaming: Apache Kafka (basic)

Testing: JUnit (basic), Mockito (basic)

Data & Machine Learning: NumPy, Pandas, Matplotlib, scikit-learn (working knowledge), PyTorch (foundational)

Cloud & DevOps: AWS (EC2, EBS, S3, IAM, VPC, Security Groups,), Git, GitHub Actions (CI/CD), Docker

Professional Skills: Continuous learning, Problem Solving, Time Management, Adaptability, Team Collaboration

ACHIEVEMENTS AND LEADERSHIP

President – Web Technology Club | CIT Ranchi (2022 – Present)

Lead the Web Technology Club, mentor members, and organize technical events.

LeetCode Solved 100+ Data Structures and Algorithms problems on LeetCode.
